Lydeck decking is an advanced outdoor solution, offering a realistic look and exceptional durability thanks to its ASA technology and carbon nanotechnology core.

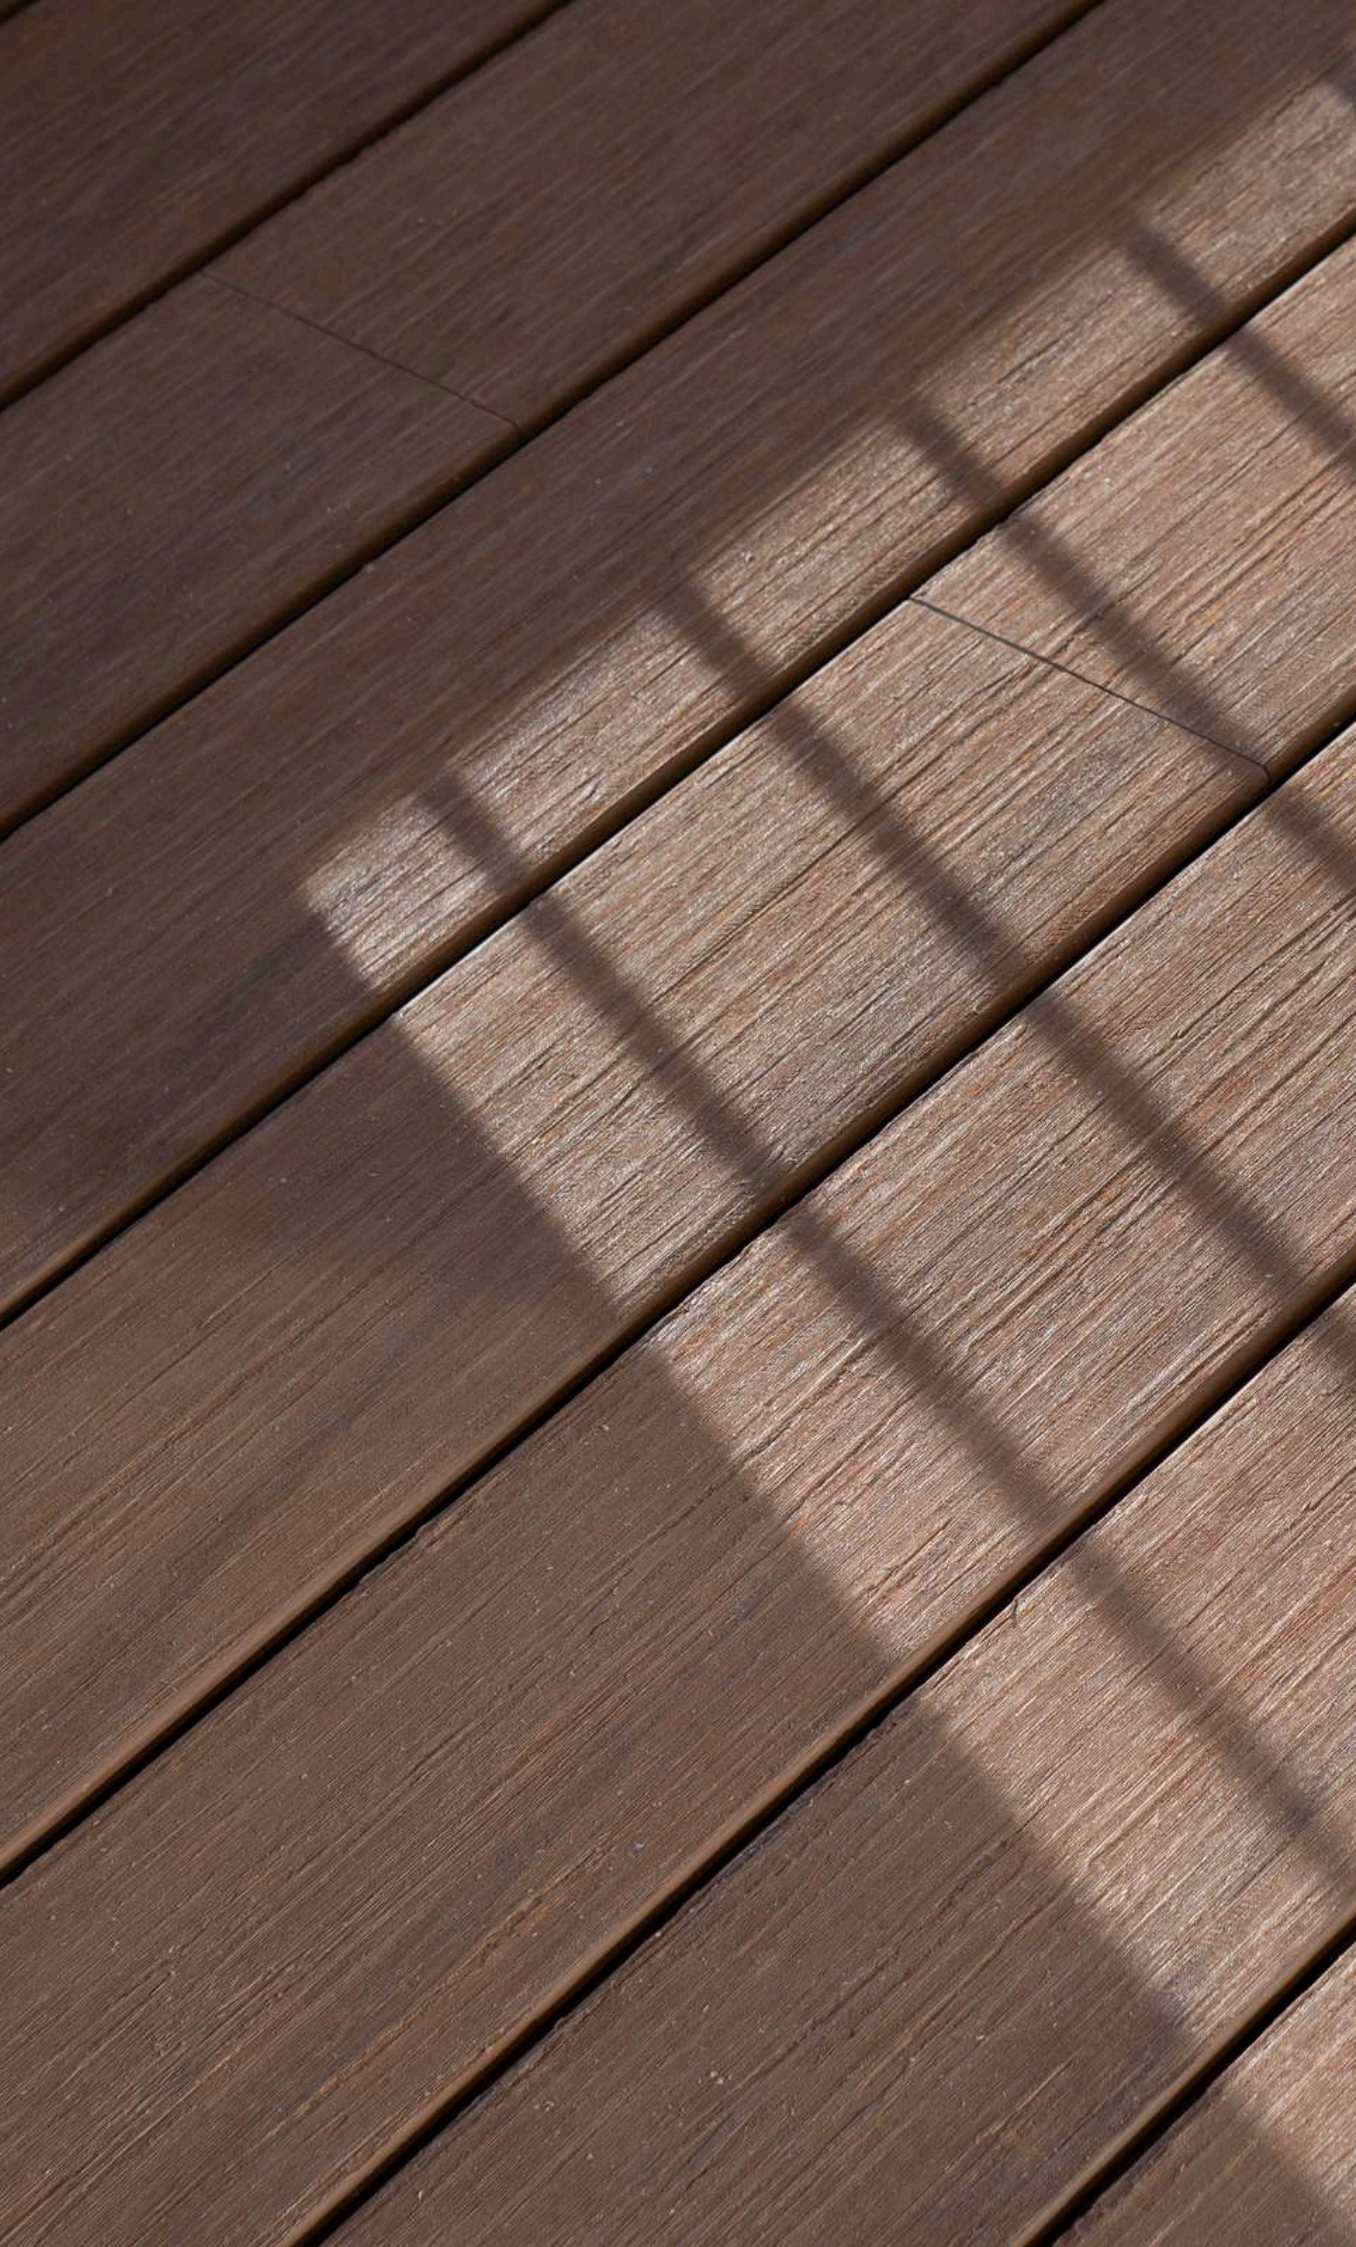

Scratch, impact and UV resistant, it maintains its appearance over time. Its lightweight, non-slip design makes installation easy and ensures comfort in hot climates, while being waterproof and low maintenance.

Paviproof decking is a durable alternative to natural wood, with complete protection thanks to its coating that prevents stains, scratches, discoloration, water and humidity.

Ideal for outdoors, such as swimming pools and gardens, its non-slip design (Class 3) and elegant wood-imitating finish make it suitable for multiple spaces. It requires minimal maintenance, without the need for paints or varnishes, and is resistant to pests and deformation.

Pavideck technological decking is ideal for outdoor areas such as swimming pools, gardens and terraces, thanks to its resistance to water, humidity and its non-slip finish that prevents falls. It is immune to pests and does not rot, guaranteeing durability.

Its design is pleasant to the touch and sound-absorbing, ideal for quiet environments. In addition, its installation is quick and easy, with accessories available in matching colours and the option of customising finishes on request.

The PAVIFENCE PRO Encapsulated Synthetic Technology Fence from the CLOSE series offers an elegant and durable solution for delimiting outdoor spaces, guaranteeing privacy with its design without separation between slats.

Made from recycled materials, its plastic coating protects it from stains, scratches and moisture, ensuring durability without the need for conservation treatments. Ideal for gardens and terraces, it combines functionality with a high-quality finish and aesthetic adaptability.

The PAVIFENCE Synthetic Technology Fence from the CLOSE series is a modern and functional solution for delimiting outdoor spaces, made from high-quality recycled materials. Its design without separation between slats provides greater privacy and a uniform appearance, making it ideal for gardens and terraces.

Although it lacks the plastic coating of the encapsulated version, it is weather-resistant and does not require special treatments. Its maintenance is simple, as it only needs water, and it is durable, resistant to pests and available in various finishes and colours.

The Duowall encapsulated façade, made of engineered wood, is a durable and resistant option for exteriors, which does not crack, deform or rot, unlike natural wood. Its 360° HDPE coating protects it from pests and provides acoustic insulation, with low lateral expansion.

Duowall offers a uniform and natural aesthetic, without the need for additional treatments, which reduces maintenance costs and guarantees a warm and elegant appearance.
